I'm a graphic designer based in Krakow, Poland, with a valid work permit, looking for opportunities to work on meaningful projects where I can grow and contribute. With 4 years of experience, I started as an artist, selling paintings and teaching, which helped me develop creativity, communication, and problem-solving skills. I've worked on various projects, first as a freelancer and later in a company, gaining experience in both independent and team-based work. I'm always improving, staying up to date with trends, and balancing both technical skills (UI/UX, branding, digital design) and soft skills (communication, adaptability, problem-solving). Passionate about design and innovation, I'm excited to take on new challenges!
